Bioprocessing Summer Undergraduate Internship Training and Education

BSUITE

The BSUITE program for undergraduate research in bioprocessing and bioengineering provides an opportunity for participants to obtain valuable experience through team projects based on bioprocessing for the production of monoclonal antibodies, enzymes, and vaccines as well as cell and gene therapy.

During this exciting two-week online summer program, participants will learn about technical and regulatory considerations for production of biopharmaceuticals including biotechnology and cell line engineering, cell growth, product purification, viral controls, and quality systems.

**2020 Dates**

- Session #1 .......... June 22-July 2
- Session #2 .......... July 6-16
- Completion Ceremony (for both sessions): July 17

**Who Should Apply**

The program is designed for undergraduate juniors or graduates interested in starting KGI’s Master of Engineering in Biopharmaceutical Processing program in the future. We focus on candidates majoring in biology, chemistry, biotechnology, bioengineering, chemical engineering, or related disciplines who are looking to build a strong foundation for a future career in manufacturing of biologic products.

**Cost:** Free of charge. Participants are responsible for having a personal computer with broadband Internet access.
How to Apply
Apply online at kgi.edu/summer

Application Deadline:
Rolling

Application Requirements
An online application form is required that contains questions about your personal and educational background. Additional requirements can be submitted along with your online application:

- Personal statement
- Resume
- Letter of recommendation
- Transcripts

Application Review
We will review applications on a rolling basis. We take a holistic look at each applicant, and place great importance on letters of recommendation and your personal statement. We will strive to notify you about the status of your application as soon as possible.
