Medical Device Development Bootcamp

MDD

The Medical Device Development Bootcamp is a two-week, online learning opportunity for students interested in the process for designing and manufacturing medical devices. MDD is a great entry into KGI’s Master of Science in Medical Device Engineering program.

2020 Dates
• Session #1 ........ June 15-26
• Session #2 ........ July 6-17

What You Will Learn
• Identify user needs for medical devices through primary and secondary research.
• Combine product needs with fundamental science and engineering to develop a prototype medical device for the benefit of society.
• Understand and apply best practices in manufacturing, assembly, quality, and operations for commercialization of medical devices.
• Contribute productively on an interdisciplinary team tackling complex design and engineering problems.

Who Should Apply
Sophomore, junior, and senior undergraduate students interested in medical device development currently enrolled in a STEM program.

Cost: Free of charge
How to Apply
Apply online at kgi.edu/summer

Application Deadlines:

June 1 for Session #1
June 15 for Session #2

Application Requirements
An online application form is required that contains questions about your personal and educational background. Additional requirements can be submitted along with your online application:

• Personal statement
• Resume
• Letter of recommendation
• Transcripts

Application Review
We will review applications on a rolling basis. We take a holistic look at each applicant, and place great importance on letters of recommendation and your personal statement. We will strive to notify you about the status of your application as soon as possible.
