About the Program

The field of genetics has changed dramatically over time. Therefore, the student experience at KGI involves a strong foundation in principal genetic counseling skills coupled with progressive and rigorous didactic learning, fieldwork experience, and research development in order to meet and anticipate the evolving needs of the genetic counseling profession. The combination of the program’s faculty, the diversity of fieldwork experiences, and the cultural excitement of its location in Southern California makes this program exceptional and inspiring.

The program provides each student with the understanding and experience to become an innovative, inspired, and proficient genetic counselor.

Seventy and a half credits are required to earn a MSGC degree at KGI. These credits consist of 38.5 from didactic courses, 26 from clinical fieldwork, and six from research thesis. Students are expected to finish the program in 21 months (five semesters) on a full-time basis.
Career Options with a Degree in Genetic Counseling

Many genetic counselors work in research, public health, or genetic counseling programs.

70–75%

Most genetic counselors are working in direct patient care in medical centers, hospitals, private practices, etc.

25–30%
